Summary

As a Full-Stack Software Developer with over four years of experience, I build scalable web applications and backend systems that solve real business problems. I specialize in JavaScript, TypeScript, and Golang, developing modern web platforms with React, Next.js, and Vue, while designing efficient backend services using Node.js, Golang, MongoDB, and PostgreSQL.

Beyond being result-driven, I am strongly process-oriented, focusing on clean architecture, maintainable code, and reliable CI/CD deployments. I prioritize performance, security, and system scalability to ensure applications remain stable and aligned with business goals.

Experience

→ **Software Developer** • October 2025 - Present

Ennovate Lab   Software Agency

- Built and maintained scalable web applications using React, Next.js, and Vue across fintech, education, and other client services, delivering secure, high-performance user interfaces integrated with backend systems.
- Designed and implemented secure backend APIs using Node.js, Golang, TypeScript, PostgreSQL, and MongoDB to support authentication, transaction handling, and role-based access control across fintech, education, and other client services.
- Developed and maintained cross-platform mobile applications using React Native for fintech, education, and other services, enabling users to manage tasks, access content, and perform actions seamlessly on iOS and Android.
- Architected and optimized database interactions to improve transaction reliability and system performance under concurrent user activity.
- Implemented CI/CD pipelines and managed deployment workflows on Azure to ensure reliable releases and environment consistency.
- Collaborated closely with product managers, designers, and cross-functional teams to translate business requirements into secure, scalable technical solutions.

→ **Software Developer** • January 2023 - September 2025

Cephas ICT HUB   Software Agency

- I have designed and developed end-to-end web and backend solutions using Vue, React, Next.js, Node.js, TypeScript, PostgreSQL, and MongoDB, delivering scalable, secure, and production-ready applications for fintech, e-commerce, health-tech, ride-sharing, and other client projects.
- I have built and maintained 10+ cross-platform mobile applications using React Native, reaching 30,000+ downloads, ensuring smooth performance, responsive UI, and excellent user experience on both iOS and Android.
- I carry out multiple iterations of features while collaborating closely with designers, product managers, and backend engineers to deliver client projects on time and aligned with business and user requirements.
- As a tutor and mentor, I guide junior developers and students in building web and mobile projects, sharing best practices in coding, architecture, and deployment.
- Worked with product managers, designers, and engineering teams to deliver secure, scalable solutions that met business goals and user needs.

→ **Software Developer - Mobile** • Contract

Versecog Enterprise   E-commerce Fashion

- I collaborated directly with the client to gather requirements and translate their vision into functional features for a fashion e-commerce mobile application.
- I developed key application screens using React Native, ensuring responsiveness, smooth navigation, and alignment with design specifications.
- Iterative feedback was incorporated to refine the user interface and functionality, delivering a seamless shopping experience for users.

→ **Software Developer** • Contract

StudyPady   Edutech

- I led the end-to-end development of the StudyPady mobile app, web app, and backend system, a learning platform serving 2,000 registered students with 200 daily active users at LAUTECH and Bowen University.
- I engineered key features including CBT practice, past question access, and a real-time leaderboard, significantly improving academic engagement and exam preparation.
- As Community Manager, I engaged with students across two universities, building a strong, interactive learning community around the platform.

Education

→ **Ladoke Akintola University of Technology**

Bachelor of Science, Computer Science • June 2021 - Aug 2025

→ **Cephas ICT HUB Tech Training**

Software Development

Skills

Programming Languages

React, Next.js, Vue, Nuxt, React Native, JavaScript, TypeScript, Redux, Redux Toolkit, Zustand, TanStack Query, Zod, TailwindCSS, Chakra UI, Shadcn, Styled Components, Framer Motion, Expo, React Navigation, NativeBase, Reanimated, Gesture Handler, Axios

Backend & Database

Node.js, Express, Golang, REST APIs, WebSockets, MongoDB, PostgreSQL, Firebase, Supabase, Docker, Git, CI/CD, AWS, Azure, Linux, Nginx, Postman, Redis

Tools & Platform

Git, GitHub, VS Code, Postman, Figma, Trello, Notion, Expo, Android Studio, Vercel, Netlify, Render, Heroku, Firebase, MongoDB Atlas, Google Play Console, Azure
